SUMMARY

Senior Software Engineer with 5+ years of experience designing and scaling enterprise-grade backend systems using Java, Spring Boot, and microservices architecture. Proven expertise in building high-performance **REST APIs**, **optimizing database queries**. Contributed to mission-critical fintech solutions handling **real-time loan processing** and **credit bureau integrations**. Strong problem-solving skills with a focus on **scalability, reliability, and clean architecture**.

TECHNICAL SKILLS

Backend:	Java 8+, Spring Boot, Spring MVC, Hibernate
Frontend:	React.js, JavaScript
Architecture:	Microservices, REST APIs
Version Control:	Git, GitHub, Bitbucket
Agile Methodologies:	Scrum, Kanban
Security:	OWASP Top 10, OAuth2, JWT, Spring Security
Databases:	MySQL, PostgreSQL, Oracle, SQL Server
Tools:	Maven, JIRA, NPM, Postman, iBPS Developer, newgenOne Developer
AI:	Generative AI (LLM), OpenAI

WORK EXPERIENCE

Newgen Software (Senior Software Engineer)

June 2022 - Present

- Developed and delivered enterprise-scale banking and financial solutions worth USD 10M+ for Indian and international clients including AM Bank, BDO, and NABFID.
- Designed and developed scalable Spring Boot microservices for Commercial Loan Origination System (CLOS).
- Led integration with external credit bureau APIs enabling real-time verification.
- Optimized SQL queries and indexing strategies improving response time by 35%.
- Automated CI/CD pipeline reducing deployment time significantly.
- Handled production incidents and performed root cause analysis.
- Maintained 80%+ unit test coverage using TDD principles.

I-exceed Technology Solutions (Software Engineer)

August 2021 - April 2022

- Built a drag-and-drop SDUI Admin tool for Citibank using React.js, JavaScript, HTML, and CSS, serving 100,000+ end users.
- Developed interactive dashboards and data visualization charts integrated into the platform.
- Built REST APIs using Java and Spring Boot to persist and serve dynamic UI configurations.
- Collaborated in a team of 12, contributing to code reviews and Git workflows.
- Followed OWASP secure coding standards across frontend and backend.

PROJECTS

Commercial Loan Origination System (CLOS)

- Led integration of Newgen's CLOS with Factual Data, enabling secure and automated **credit bureau** access for financial institutions.
- Designed and developed RESTful microservices using **Java and Spring Boot** to streamline loan origination, credit verification, and underwriting workflows.
- Built and integrated **React-based frontend components** for loan application tracking, status monitoring, and real-time updates by consuming secured backend APIs.
- Implemented real-time automated lien and judgment verification, eliminating manual intervention and improving operational efficiency.
- Spearheaded two-way system integration with **core banking platforms**, optimizing end-to-end digital lending workflows.
- Optimized SQL queries and database indexing, improving API response time and accelerating loan processing lifecycle.
- Enhanced the credit assessment process by enabling seamless retrieval of credit bureau reports and structured financial data.
- Integrated GenAI-powered prompt-based recommendations into loan processing workflows using OpenAI, reducing manual decision-making effort for underwriters.

EDUCATION

Raj Kumar Goel Institute of Technology, AKTU

2016 - 2020

- Bachelor of Technology in Computer Science and Engineering
